

# ALLAN JOSÉ ROJAS DURÁN

Senior Full-Stack Engineer | Java | Spring Boot | React | TypeScript | AWS

Alajuela, Costa Rica | +506 7225 2296 | allan4devs@gmail.com | github.com/emeraldcr

## PROFESSIONAL SUMMARY

Senior Full-Stack Engineer specializing in Java/Spring Boot, React/TypeScript, and AWS. Experience building production microservices, APIs, event-driven services, cloud infrastructure, CI/CD pipelines, and modern web applications across enterprise, healthcare, consumer, and consulting environments.

## TECHNICAL SKILLS

**Core:** Java, TypeScript, JavaScript, SQL, Python, PHP

**Backend:** Spring Boot, Node.js, Laravel, REST APIs, GraphQL, Microservices, Eloquent ORM

**Frontend:** React, Next.js, Redux Toolkit, Blade, Tailwind CSS

**Cloud & DevOps:** AWS, Lambda, ECS/EKS, EC2, S3, RDS, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins

**Data, Testing & Observability:** PostgreSQL, MySQL, Redis, Jest, Pest, Dusk, Playwright, Cypress, Prometheus, Grafana

## PROFESSIONAL EXPERIENCE

### Senior Full-Stack Engineer

La Vieja Adventures | Apr 2026 - Present | Remote, Costa Rica

- Architect and deliver a cloud-native reservation and operations platform spanning booking, authentication, payments, and business workflows.
- Build end-to-end services with Spring Boot, React, Next.js, TypeScript, GraphQL, and MySQL, deployed and monitored on AWS.
- Develop AI-assisted tools for reservations, customer communication, internal reporting, and business operations.

### Cloud Software Engineer

EXQ2 | Client: Midland Credit Management (MCM) | Oct 2025 - Apr 2026 | Costa Rica

- Delivered and maintained a cloud-based payment control and management platform supporting Midland Credit Management operations.
- Contributed to production software delivery and cloud-based systems as part of an embedded consulting engineering team.

### Senior Software Engineer

Wind River | Sept 2024 - Oct 2025 | Remote, Costa Rica

- Designed and maintained Spring Boot microservices and event-driven backend services across AWS and Kubernetes environments.
- Built React and Redux Toolkit dashboards with real-time visualization for operational monitoring and decision support.
- Improved deployment consistency through GitHub Actions and Jenkins while strengthening production observability with Prometheus and Grafana.

### Full-Stack Engineer

Costa Rica Software Services (CRSS) | Sept 2022 - Jun 2024 | Costa Rica

- Built and maintained Laravel 8-10 applications using Eloquent ORM, authentication, Query Builder, Blade, and MySQL, paired with React frontends.
- Designed REST APIs and integrations supporting GPS tracking, payment workflows, and real-time mobility features for Kaptyn, a luxury ride-hailing platform.
- Improved API and data-layer performance through SQL optimization and caching, with automated validation using Pest, Jest, Dusk, and Cypress.

### Software Engineer

Intel | via Infosys | Feb 2021 - May 2022 | Costa Rica

- Delivered backend integrations for a chemical management system using Node.js.
- Worked in a client-facing engineering capacity through Infosys, contributing to production software delivery.

## **Software Development Engineer I**

MicroVention | Terumo | 2016 - Feb 2020 | Costa Rica

- Built Java and Python systems supporting FDA-regulated medical-device manufacturing operations and SQL-backed production workflows.
- Automated production reporting and equipment-monitoring dashboards using JavaScript and Chart.js within FDA and ISO 13485 quality environments.

## **Technician II**

ImagineerCX | 2015 - 2016 | Costa Rica

- Developed customer-facing web applications using PHP, JavaScript, and MySQL.
- Improved frontend rendering and backend performance across Agile development cycles.

## **EDUCATION**

### **Computer Engineering**

Instituto Tecnológico de Costa Rica (TEC)

**Graduation Project:** iTalent (Google Partner) - ITCR Práctica de Graduación / Proyecto de Graduación

## **LANGUAGES**

**Spanish:** Native

**English:** Professional Working Proficiency (C1)
